DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because they are hand drawn. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach calculating a cost of conversion for printed circuit boards based on a formula involving the percentage of surface mount technology components and thereby determining the labor costs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 3629

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 5,893,082 to McCormick discloses computing labor costs but does not teach using a cost of conversion based on a percentage of surface mount technology components as a function of the volume, DE 3,743,163 to Kerzel (note, the information from this patent is taken from the Derwent translation as provided) teaches making printed circuit boards and further teaches that lower costs are desirable but does not teach a labor cost estimation means for doing so.
